## Trail Description

Established in 1972, this trail was designated largely along utility rights-of-way in cooperation with the cities of Lafayette and Moraga, the Central Contra Costa Sanitary District, the EBMUD, and Pacific Gas and Electric Co.

Connecting Las Trampas Ridge to the Oakland hills, this trail corridor was once used by mule trains to carry redwood from Oakland to Sacramento. Later the lumber was carried by steam trains. With the abandonment of the railroads, the corridor became a utility easement and ultimately has become a paved multi-use recreational trail.

One of the first rail-trails in California, this 60-foot wide recreational trail corridor offers residential access, regional connections, scenic areas and convenience to local facilities.
