

# YOU ARE INVITED

## TO HELP PLAN FOR THE FUTURE OF CLAYTON RANCH REGIONAL PRESERVE

**Please Join the East Bay Regional Park District  
for a Public Input and Environmental Scoping Meeting**

**Wednesday, September 9, 2015, 6:30 – 8:00 PM  
Clayton Community Library, Hoyer Hall Meeting Room  
6125 Clayton Road, Clayton, CA 94517**

### WE NEED YOUR PARTICIPATION

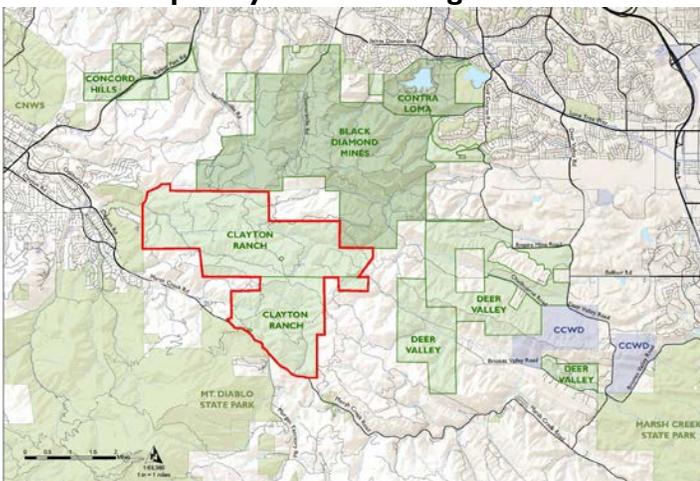

The East Bay Regional Park District is preparing a draft land use plan and environmental review in compliance with the California Environmental Quality Act (CEQA) for Clayton Ranch, a proposed 4,200-acre regional preserve located between Black Diamond Mines Regional Preserve and Mount Diablo State Park (see map below). The plan will set forth management guidelines and recommendations and will establish a long-range vision that integrates resource management with public access in this new park.

Please join us on the evening of Wednesday, September 9, 2015, as Park District staff will present a preliminary park design concept and an update on the planning process. We invite you to share your ideas for the preserve and to help identify issues to address in the land use plan and environmental review documents.

You do not need to attend the meeting to participate. Comment letters may also be mailed or e-mailed to: Raphael Breines, Park Planner, EBRPD, Planning & GIS Services Dept., 2950 Peralta Oaks Court, Oakland, CA 94605 or [rbreines@ebparks.org](mailto:rbreines@ebparks.org). You can also contact the Park District with ideas, questions, comments or to be put on the mailing list for this project at 510.544.2325.

This is the first public meeting on this project. In 2016 staff will release a draft plan and CEQA analysis for public review. These documents will be presented at a future public meeting and will be available on the Park District web site under the *Park Planning* link at: [www.ebparks.org](http://www.ebparks.org).

### Location Map: Clayton Ranch Regional Preserve

### SIGNIFICANT RESOURCES and OPPORTUNITIES

With its natural beauty, stunning views and valuable wildlife habitat, the preserve is a precious resource benefiting surrounding communities and the greater Bay Area. Park District staff has spent months collecting data and developing preliminary recommendations for management and public use of the future parkland. The 4,200 acres of land that comprise the planning area are valuable habitat for several protected plant and animal species, and will contribute to their long-term conservation and recovery.

The Park District aims to develop a balanced plan to protect and enhance scenic, natural and cultural resources while providing the public with opportunities for trail use, camping, environmental education and outdoor enjoyment.

Thank you for participating in the Park District's land use planning process.

### Meeting Location: Clayton Community Library
