

CCWD Construction Notice

November 6, 2012

Water Level Lowered at Contra Loma Reservoir for Vegetation Management & Gauge Installation

The Contra Costa Water District (CCWD) is lowering the elevation of Contra Loma Reservoir in order to perform vegetation management and install a gauge that will provide facility operators with easily obtained, accurate elevation readings.

The reservoir will be lowered to 188 feet from its maximum elevation of nearly 205 feet. Tules and other vegetation will be controlled, and the gauge will be installed near the dam. This work is expected to be completed by the end of December, and the reservoir level will be restored.

Your cooperation as we complete this important project is greatly appreciated.

Project updates will be posted as needed. Questions or concerns about the project can be directed to Gina Oltman at (925) 688-8010 or goltman@ccwater.com.
