# Wild Plants of Bishop Ranch Regional Open Space

## Grouped by Growth Form Alphabetical by Scientific Name

This document contains a comprehensive list of the wild plants reported to be found in Bishop Ranch Regional Open Space.

The plants are grouped according to their growth form for easy accessibility. These four groups are: Ferns & Horsetails, Grasses & Grasslike, Herbaceous, and Woody.

The plants within each group are listed alphabetically by scientific name. Other information on each plant includes the common name, family, whether the plant is native or introduced, and its longevity.

For quick reference, the upper left corner of each page displays both the group name (based on growth form) and the genus of the first scientific name.

### The abbreviations used:

✓	Checklist column for marking off the plants you observe
<b>Scientific Name</b>	According to <i>The Jepson Manual: Higher Plants of California, 1993</i>
<b>Common Name</b>	According to <i>Jepson</i> and other references (highly variable)
<b>Family</b>	The scientific plant family name according to <i>Jepson</i>
<b>L</b>	Longevity: Annual ( <b>a</b> ), Biennial ( <b>b</b> ), Perennial ( <b>p</b> ), or a combination
<b>N/I</b>	Native ( <b>n</b> ) or Introduced ( <b>i</b> ) according to <i>Jepson</i>

The listing of plants included in this document is by no means complete. The intent is to maintain an ongoing inventory to which additional plants can be added over time. Readers are encouraged to report any corrections or additions to this list by emailing the District Botanist (Wilde Legard, [wlegard@ebparks.org](mailto:wlegard@ebparks.org)). This welcomed assistance will help facilitate improved management of the Park District's natural resources.
