

BOARD FINANCE COMMITTEE

EAST BAY REGIONAL PARK DISTRICT
 2950 Peralta Oaks Court
 Oakland, CA

**September 22, 2010
 12:45 p.m., Board Room**

The following agenda items are listed for Committee consideration. In accordance with the Board Operating Guidelines, no official action of the Board will be taken at this meeting; rather, the Committee's purpose shall be to review the listed items and to consider developing recommendations to the Board of Directors.

AGENDA

<u>STATUS</u>	<u>TIME</u>	<u>ITEM</u>	<u>page #</u>

EAST BAY REGIONAL PARK DISTRICT
BOARD FINANCE COMMITTEE
AGENDA STATEMENT
MEETING DATE – SEPTEMBER 22, 2010

SUBJECT: Authorization to enter into an operating agreement with the East Bay Regional Communications System Authority (EBRCSA) and to commit current and future funding for the purchase and ongoing operation of 75 radios.
Report Prepared by Dave Collins and Tim Anderson

ATTACHMENT: Background and historical information regarding EBRSCA

RECOMMENDATION: It is recommended that the District enter into an operating agreement with the East Bay Regional Communications System Authority (EBRCSA) and to commit current and future funding for the purchase and ongoing operation of 75 radios.

DESCRIPTION:

The EBRCSA is a Joint Powers Agency formed to consolidate radio systems for local agencies in Alameda and Contra Costa County. This consolidation is intended to provide local agencies with a common radio system to provide for direct communications across all agencies. District staff has been evaluating the consolidated radio system under construction by the EBRCSA for several years and believes that the District should participate in this regional effort by equipping our Public Safety staff with EBRCSA equipment. However, the EBRCSA system will not provide adequate in-park service for Operations, Maintenance or other functions; therefore, the District will need to retain our current radio system and Dispatch Center in operation. As an additional consideration, the expense of replacing all District radios with the EBRCSA system would be prohibitive.

The EBRCSA system will be under construction through 2012, with full operation anticipated early in 2013. A brief background of the EBRCSA is attached to this material. Local agencies are being asked to authorize participation this year, and there is a partial financial incentive to pre-funding certain costs.

Cost:

There are two cost components of this action:

- I. **Radio purchase costs:** Radios are anticipated to cost up to \$5,000 each. At this rate, the total purchase cost of 75 radios would be \$375,000. A multi-agency purchase process, which is anticipated to be coordinated by the EBRCSA, could significantly lower this cost. Radios need to be purchased prior to the 2013 start of service. Due to the restricted availability of funding, staff is not recommending an appropriation of funds at this time, and does not expect an appropriation in the 2011 base budget. Opportunity funding from the General Fund will be considered during mid-year 2011, and further budget consideration may be necessary in the 2012 budget process.

2. **Monthly Maintenance/Subscription Fee:** The District will need to pay a monthly subscriber fee per radio that includes both maintenance and operational expenses. These fees will begin in F/Y 2013/2014.

There are two maintenance/subscription fee options available to the District:

- i) **Payment of an all-inclusive monthly fee** that covers a pro-rata share of all system construction, maintenance, replacement and operation costs (that have not otherwise been funded by grants). This fee is anticipated not to exceed \$45 per radio/month, or \$40,500 per year. The fee may be less if the number of participating agencies increases and/or the total number of radios/subscribers in the program is greater than 11,000. Under this option, some of the initial system costs will be funded through bonds, and a portion of the \$45/mo. fee will be used to repay the principal and interest on the bonds.
- ii) **Prepayment of a portion of the maintenance/subscription fee:** At the time of the initial commitment to participate, local agencies have the option to pre-fund, at a lower cost, that portion of the monthly fee that would otherwise be funded through borrowing by the JPA. This pre-funding, at an estimated \$118,000 for the District's 75 radios, would reduce the monthly maintenance/subscription fee to not more than \$29/mo/radio; again, starting in 2013. This is a significant savings over the 15-year life of the agreement. Staff is recommending that the District pre-fund this amount in 2010 through the re-appropriation of unused project funds for the Public Safety Locker Room construction project. Given the District's recent emphasis on acquisition of a new Public Safety administrative office, this project has been made obsolete, and the funds can be redirected to this higher priority use.

By acting to join the EBRCSA and commit to a 75-radio fleet, the District will be contractually obligated to purchase the radios and to pay the monthly maintenance/subscription fee in future years.

Recommendation: Staff is requesting the Committee's recommendation to proceed with this project, and to seek authorization from the Board for both execution of an operating agreement and for commitment of funds to this project as discussed above.

Background on the EBRCSA:

The EBRCSA currently includes 36 member agencies from both counties, 29 cities, 4 special districts, and the University of California. The JPA Board of Directors includes 23 representatives consisting of Elected Officials, Police Chiefs, Fire Chiefs, and City Managers. AGM Tim Anderson serves as a member of this Board.

The current estimated cost to complete the new system is \$69,952,910. EBRCSA has secured approximately \$39 million in funds from the Bay Area Super Urban Area Security Initiative, Urban Area Security Initiative, State Homeland Security and COPS grant programs. To date, funds have been used to develop the system and purchase equipment.

EBRCSA has been working with Alameda and Contra Costa Counties on a financing strategy that incorporates a combination of grants and debt financing to fund the remaining \$30,987,000 needed to complete the system. An additional \$13,987,000 in state and federal grants are anticipated to be received over the next 4 years, leaving a total of \$17,000,000 to be financed.

Both Alameda and Contra Costa counties are currently preparing to issue new debt to fund projects unrelated to EBRCSA. In doing so, both counties are taking advantage of American Recovery and Reinvestment Act bonds, which will require the transactions to be completed prior to the end of 2010.

In lieu of EBRCSA independently undertaking a \$17,000,000 financing endeavor, both counties have agreed to increase the size of their issuance to include the needed EBRCSA funds. Based on the distribution of system users, Alameda will increase their issuance by \$10,200,000 and Contra Costa will increase their issuance by \$6,800,000. EBRCSA will then issue bonds to the counties.

This financing arrangement with the two counties offers significant advantages to EBRCSA. The size of the issuance and creditworthiness of the counties will result in a much lower interest rate, avoid the need to go through a rating process, reduce issuance costs and lower costs for all participants.

Monthly per radio charges (user fees) will be determined based upon a total annual debt service payment of \$2,066,000, plus annual system operations and maintenance costs of \$3,850,000, divided by the total number of radios operating on the system.

EAST BAY REGIONAL PARK DISTRICT
BOARD FINANCE COMMITTEE
AGENDA STATEMENT
MEETING DATE – September 22, 2010

SUBJECT: Measure AA Reconciliation/Adjustment Proposal
Report Prepared by: Pam Burnor, Budget Manager

RECOMMENDATION: Review and Accept Measure AA Project Corrections and Recommend Approval by the Board of Directors.

DESCRIPTION: Corrections to Measure AA Project Funding and Adjustments to Allocation Areas

Background

In 1988, voters in Alameda and Contra Costa counties approved Measure AA – a \$225 million bond measure to fund parkland expansion and development. The District has successfully utilized the bond proceeds over the last twenty-two years expending the funds through more than eight hundred projects.

At inception, the District’s financial system had no job ledger to track project activity as we do today. Financial transactions were recorded for project work via fund and department. Measure AA allocations and appropriations within the allocation areas were recorded outside of the financial system with a separate database to determine how much of the bond funding had been used.

In 1999, the District purchased a new financial accounting system (IFAS) that has both a general ledger for annual appropriations and job ledger to track project budget and actual transactions over their multi-year lives.

As we draw closer to spending the final allocated amounts from Measure AA bond funding, staff found that the District financial system and the data base set up to track Measure AA allocations by location and metro, were out of sync.

Review Process

In 2008 Finance staff began a limited review of closed and ongoing Measure AA projects to determine the corrections required to bring the two tracking systems into agreement. Another goal was to verify the amount of interest versus principal, held by the bond trustee. Our first approach identified specific projects that had differences between amounts listed in the Access database compared to IFAS financial system records. When we scrutinized the detail of those projects we found some revenue posting errors. The errant transactions obscured amounts that should have been billed to the bond trustee for reimbursement. When the issue of mis-posted revenue came to light, we expanded the scope of our review to include all 589 projects in IFAS, looking at the detail of bond revenue to insure that the amounts posted actually represented reimbursement from the trustee.

Findings

Attachment A lists projects with a net amount of \$47,396.74 that can be returned to the General Fund. In most cases the dollars represent District funds from interest revenue earned, related to escrow holdings.

Attachment B lists \$161,357.23 netted from forty-two accounts that can be billed to the trustee. Our examination found some projects were not reconciled before they were closed; whereby transactions should have been moved via journal entry to match the various funding source budgets within the project. Without moving the transactions to the correct funding sources, it was difficult to determine that the trustee needed to be billed. We reconciled the projects as part of our process. Some projects have an amount that will be returned to the trustee, others are being billed.

Attachment C shows the detail of Finance's proposal to swap close to \$3 million dollars in bond interest for bond principal in the IFAS system. The proposal includes adjustments to interest by allocation area for a net appropriation increase of \$128,656. A major cause for discrepancy within the two tracking systems was due to confusion of bond principal versus bond interest appropriation. The Measure AA Access database tracks bond interest use by allocation area, but not by individual projects within the areas. Finance staff has struggled to keep principal and interest balances correct over the years of the program. In July 1996 a board resolution appropriated \$6,483,084 from bond interest to resolve overspent allocation area balances within the database. While the database allocation areas were balanced by that action, the appropriations were not project specific, leaving us to resolve the project specific issues that resulted from that board resolution, today. The proposed corrections to Measure AA projects will result in changes to the proportions of bond interest by metro.

Future Adjustments

Two fund balance discrepancies remain to be resolved. Project #210800, Bray Oil acquisition at Miller/Knox may include \$400,000 to be returned to the General Fund and or the Designated for Land Fund. Project #200000 District Wide AA Revolving Fund may hold as much as \$810,000 to be returned to the General Fund. It is difficult to interpret the transactions that occurred in these job ledger accounts that straddled the conversion from the District's old HP financial system. We want to be certain that excess funds in this amount reside in the capital fund before we make any transfer. Therefore, we plan to verify the capital fund balance prior to any action related to these two projects. We will perform the fund review with the assistance of an intern in 2011.

Finance staff has worked diligently to review and reconcile the hundreds of projects that were subject to Measure AA funding however we did not review all Measure AA projects and we do not consider our task complete. Staff will continue to monitor the more than one hundred current and future projects that involve Measure AA funding to ensure that the allocation area database remains in sync with IFAS. If any required adjustments come to light, we will bring those items to the Board's attention in a timely manner.

Recommendation

Upon recommendation of the Board Finance Committee, staff will prepare a resolution for consideration of the full Board of Directors that includes the proposed account corrections outlined in attachments A, B, and C, including additional bond interest appropriation of \$128,656.
