

Southeast Sector - Wilderness In-Class Programs

The Southeast Sector can bring the parks into your Tri-Valley area classroom! Available from Danville to Fremont, Dublin to Livermore, and anywhere in between.

Choose from one of the following programs and have a naturalist come teach your class using fun, hands-on activities.

Standard programs are geared toward grades 1-5 NGSS, but we are also able to tailor programs to fit middle and high school NGSS.

Program	Grade	Duration	Max # of Participants
<p>Plant Perspectives Discover the secret world of plants and learn how these amazingly diverse living beings thrive on Earth. Topics will include life cycles, pollination, seed dispersal, growth & development, and animal relationships.</p>	1-5	45-60 min	1 class
<p>Skull Detectives Be a scientific sleuth and deduce whose skull is in your hands. Learn how to identify different types of animals based on skull anatomy and adaptations. Topics will include evolution, structure & function, vertebrate anatomy, and comparative analysis.</p>	1-5	45-60 min	1 class
<p>The East Bay's Wild Side This in-class safari will take you on a journey through the hills, valleys and creeks of the greater East Bay. Learn about the animals of past and present and how we can be good neighbors. Topics will include modern ecosystems, urbanization, historic ecology, watersheds, and conservation.</p>	1-5	45-60 min	Can be offered for 1 class, or assembly-style
<p>Not So Creepy Creatures Bats, spiders, snakes and insects are some of nature's most valuable animals. We'll debunk myths and reveal their essential roles in our lives. Topics will include vertebrates, invertebrates, ecosystems, human perception and bias, conservation, and evolution.</p>	1-5	45-60 min	Can be offered for 1 class, or assembly-style
