Albany Beach Restoration and Public Access Project

East Bay   
Regional Park District  
www.ebparks.org

## Phase I Construction Work

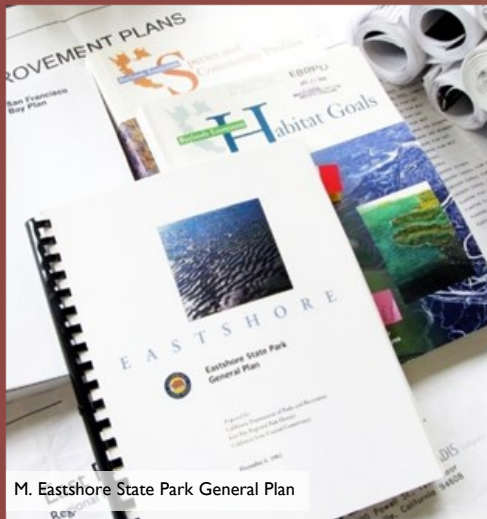

Shoreline Stabilization, Habitat and Trail Improvements

### Construction Starts June 8, 2015

Starting Monday, June 8, 2015, East Bay Regional Park District will begin repairing the eroding shoreline along the “Lower Neck” trail connecting the Albany Plateau to the Bulb. The project will stop erosion of the landfill and trail into San Francisco Bay, enhance habitat and improve accessibility for disabled & mobility impaired visitors.

Park visitors should expect to see truck and heavy equipment accessing the park to conduct this work. Public access to the bulb, beach and eastern portion of the plateau (loop around the Burrowing Owl/Fenced area) will remain open to the public. The western Plateau and Lower Neck trail will be construction work zones closed to the public. These areas are scheduled to re-open for park use after construction is complete around November 2015.

To protect public safety during this work, please do not enter the work area, obey signs and construction flaggers and keep your dog(s) on leash and away from trucks and heavy equipment. Thank you for your cooperation and we apologize in advance for any inconvenience this may cause.

M. Eastshore State Park General Plan

South Neck Shoreline Erosion

**Project Sponsor:**

East Bay Regional Park District

**Location:**

McLaughlin Eastshore State Park

**Affected Area:**

Lower Neck Trail (Albany Neck), Western Plateau, Trail Detours

**When:**

June 8, 2015 through November 1, 2015

**Purpose:**

Shoreline repair, habitat enhancement, public access improvements

**Contact:**

Chris Coles, District Construction Representative, 510-393-5112
