Digital Learning Interpretive Program Descriptions

Our naturalists can virtually meet your students in a classroom setting or outdoors

Description	Grade	Duration
Digital Classroom		
Reptiles / Amphibians Students review the differences between reptiles, amphibians, and humans, and meet a real reptile!	All Grades	30 - 45 minutes per class
Plants Students learn the six plant parts and their importance to both plants and humans.		
Lifecycles Students discover the similarities and differences of the unique lifecycles of living things (including ourselves!) Observe and draw living specimens in different stages of their lifecycles!		
Virtual Hike		
Experience the Regional Parks with a digital-based hike hosted by one of our naturalists in the field. The program's theme of either Plants or Habitats , aligns with NGSS. NOTE: This program depends on current air quality conditions and may need to be shifted indoors.	All Grades	30 - 45 minutes per class
